**The universal solution
for your residential and
tertiary building projects**

:hager

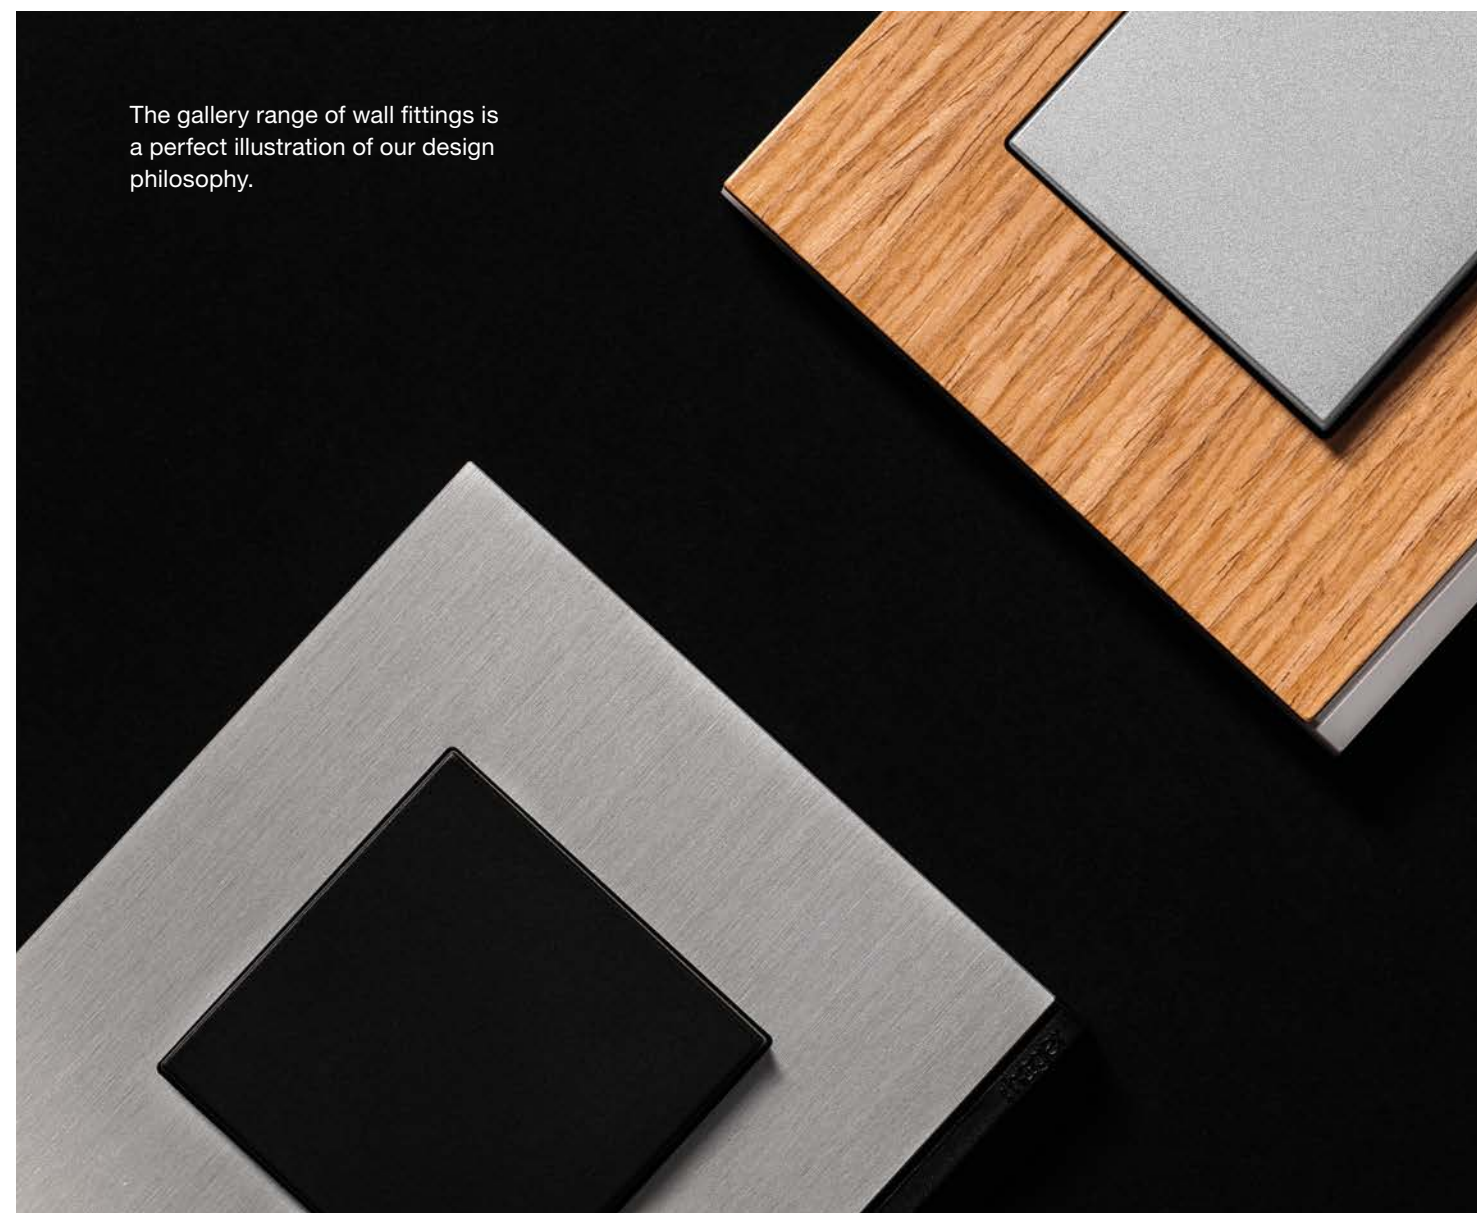

See. Understand. Touch. Feel.

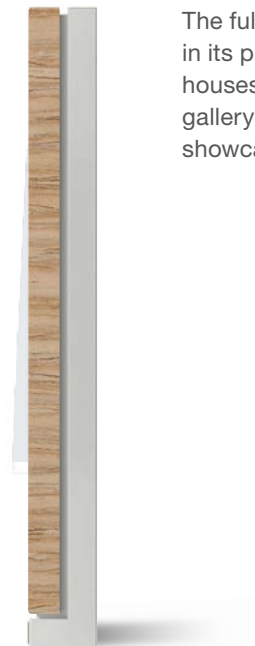

Although often highly technical, design deals first and foremost with the realm of emotions: seeing, understanding, touching, feeling...

This is why, at Hager, we choose to give our products a recognisable face: one expressing balance, serenity, elegance and understatement... Emotion becomes a matter for technology, not merely an aesthetic statement. This is what we strive for each day, and it remains our passion.

Erwin van Handenhoven
Design Director
Hager Group

Admire the profile

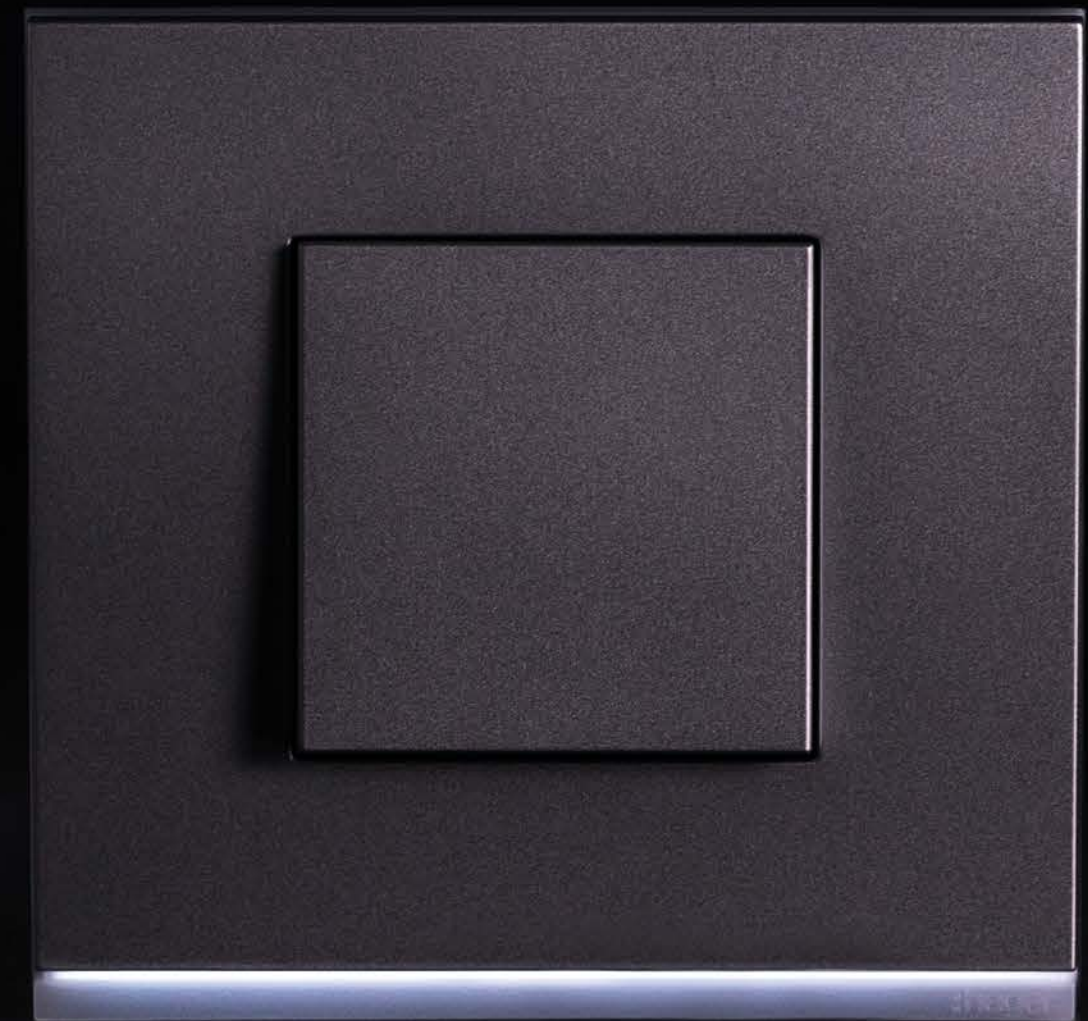

The full impact of any face lies in its profile. The bracket that houses the material provides gallery with an attractive, subtle showcase.

Lighting at its most subtle

The illuminated strip

As an option, a delicate strip of light can be selected for a gentle, graceful touch.

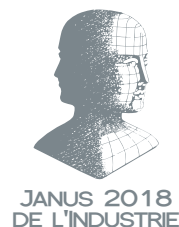

An award-winning range

Gallery has won two major distinctions: the Janus de l'Industrie, and the Good Design® Award.

Introduced in 1953, the Janus de l'Industrie is one of the most acclaimed industrial design awards in France. The Institut Français du Design (French Design Institute) selects products and services that respect users and their environment. gallery was recognised for its excellence using five criteria: economy, aesthetics, ergonomics, ethics and emotion.

Founded in 1950 in Chicago, the Good Design® Award aims to promote contemporary design. It recognises products and leaders in the industry responsible for opening up new avenues of innovation in the fields of design and manufacture. The Good Design® Award is the world's oldest and most prestigious awards programme for excellence and innovation in design.

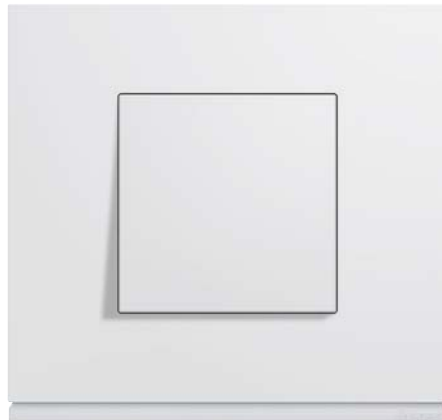

gallery, a mosaic of solutions

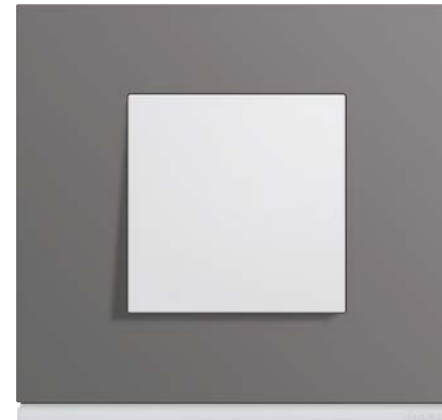

With authentic materials, a kaleidoscope of colours, structured décor, and multiple reflective effects, gallery allows for great freedom of choice. The structure of this range enables an overall balance to be achieved, creating high quality finishes to match current or future surroundings.

gallery comprises 28 finishes available with plates which are through-coloured, painted, covered in fine material or made from solid pieces of material.

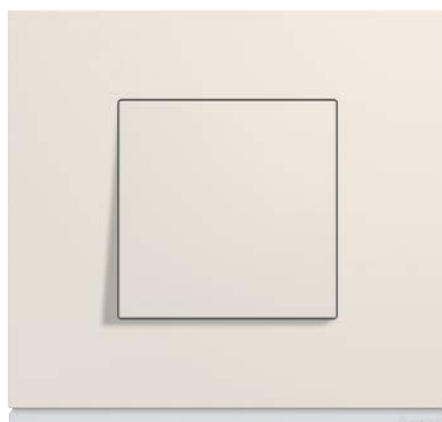

pure

taupe

champagne

dune

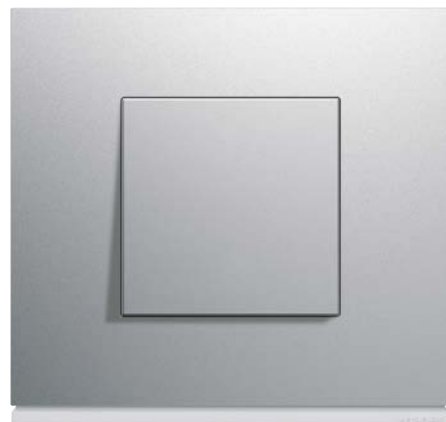

Painted finishes
The pure and dune plates are through-coloured. The metallic and satin-brushed finishes are painted.

river

rosé

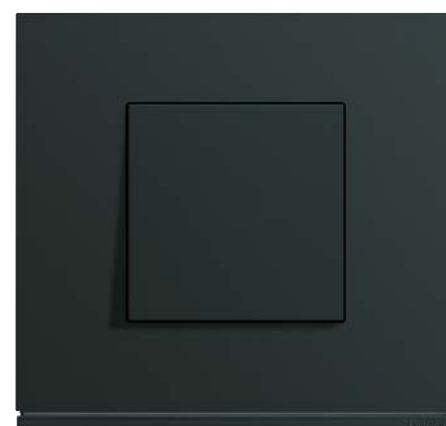

titanium

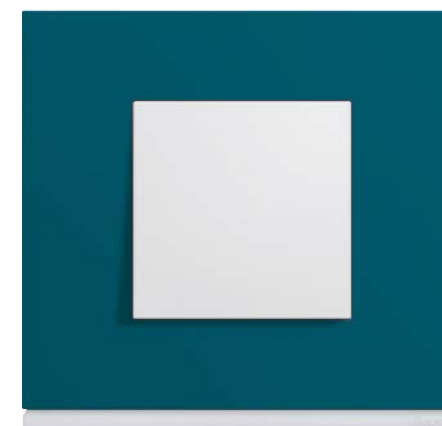

anthracite

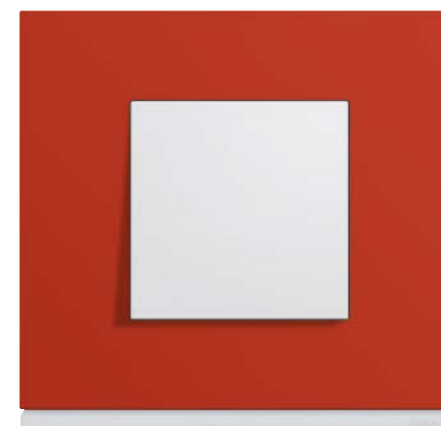

The subtle combination of anthracite and black is a clever alternative to an all black finish.

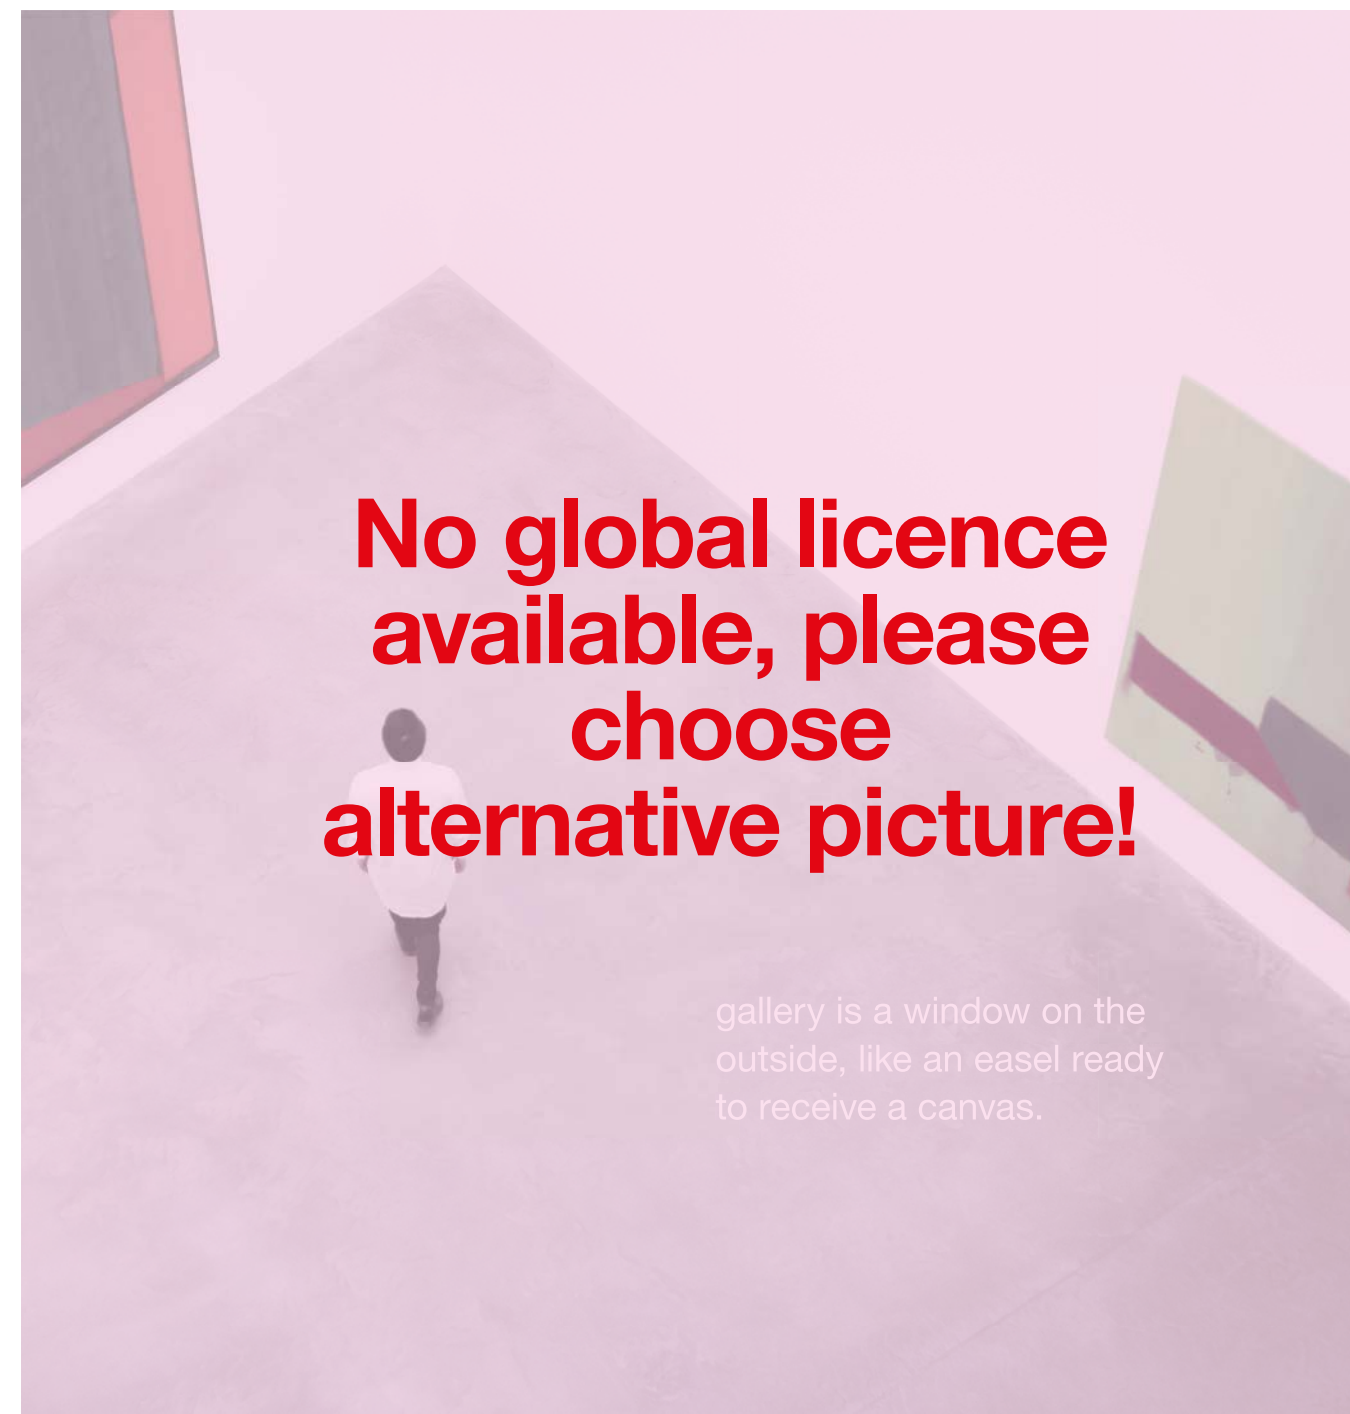

night

peacock

eglantine

gallery is a window on the
outside, like an easel ready
to receive a canvas.

Touch the reliefs

copper aluminium

natural aluminium

With a subtle matte metallic effect, the brushed aluminium is perfectly showcased by the black easel on which it sits.

Cord leather is classic yet innovative, thanks to the quality of the leather used and fine stitching which frames the material.

cord leather

grey wood

oak wood

dark rock

The dark rock plate is cut directly from solid slate.

Like a nutshell, pecan expresses itself through its texture and the richness of its brown hues.

pecan

bright stainless steel

coffee leather

latté

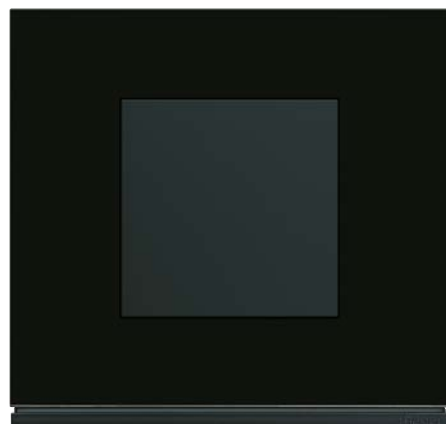

The gentle texture of latté is both seductive and expressive, creating an atmosphere of warmth.

See the reflections

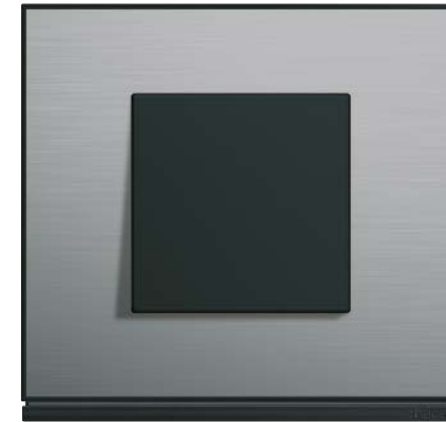

moon glass

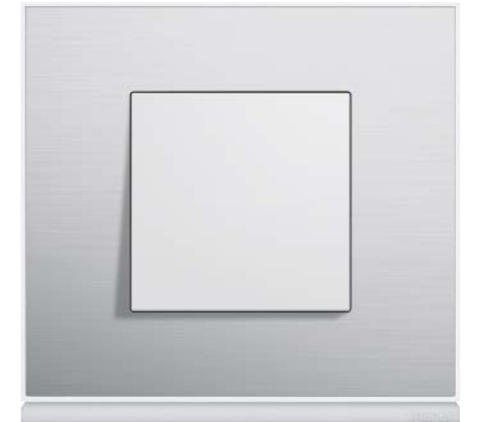

Exuding a softness, moon glass combines the brilliance of glass with a gently frosted finish.

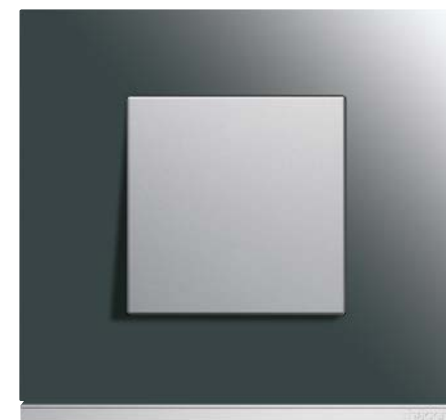

midnight glass

steel

aluminium

mirror glass

Its tinted mirror effect turns this plate into a chameleon, for an ever-changing result.

antique aluminium

bronze

The range made simple

Four elements that can be combined as required.

gallery is designed to offer great freedom of choice and configuration, enabling optimum use of all the references, whether the project is for tertiary or residential premises.

01

Mount

Made from metal and plastic, it offers a good compromise between rigidity and flexibility, and is easy to adjust when being installed. The mounts can be combined to form multi-gang units and can be trimmed for a centre-to-centre distance of 57 mm.

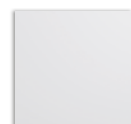

02

45x45 mm mechanism

With the new "SanVis" screwless system, a small "click" ensures that the conductor is secure. The terminals are compatible with flexible and rigid 1.5 mm² and 2.5 mm² conductors.

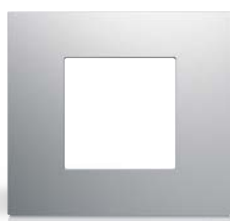

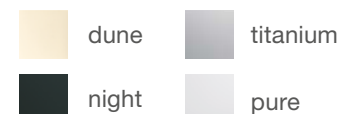

Hager patented

03

Cover trim

Available in four colours.

04

Plate

28 finishes, 1 design, 16 sizes: 1 gang, 2 gang, 3 gang, etc. For a perfect result, the plate features a compensation system that counteracts any defects in the wall.

Option

Illuminated strip

This fine strip of light can be easily added by attaching directly to the mount. It can be set to perform either a status control or indicator function. Available for horizontal and vertical plates.

Hager patented

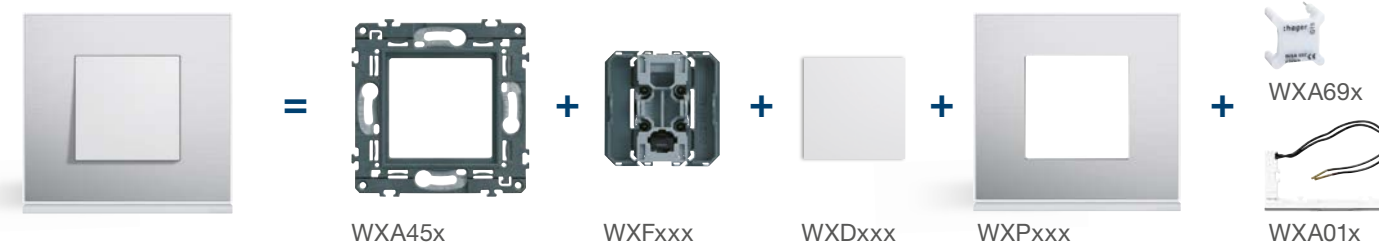

Option

Universal indicator

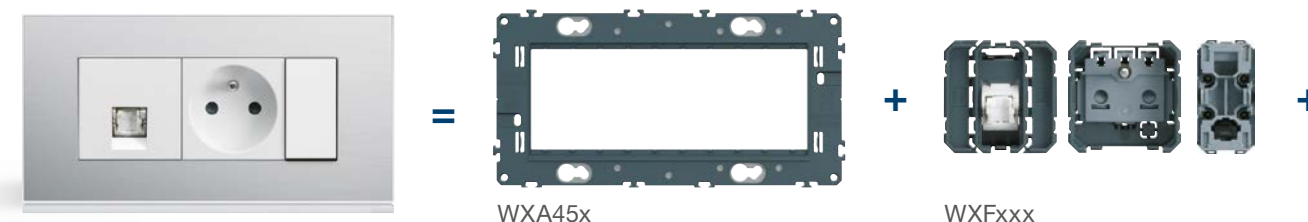

This is placed onto the mechanism and can be used as either a status control light or an indicator light. Only one part is needed for both functions – simply rotate it manually to switch between the two.

Hager patented

Flush-mounted or surface-mounted configuration

Multi-gang configuration

Trunking, floor boxes, power outlet blocks and compact towers

1 mechanism and 1 cover trim (assembly required).
WXFxxx + WXDxxx

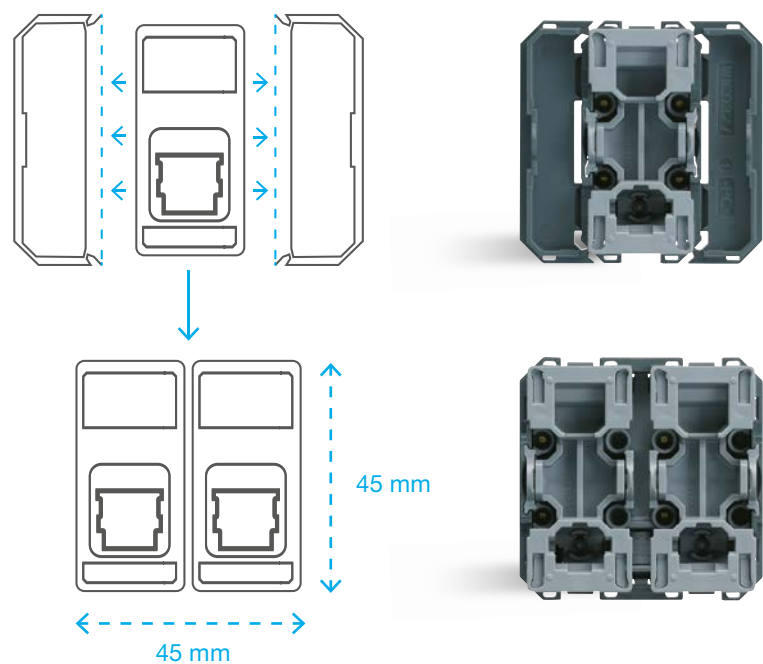

"Special trunking" power point or switch in the form of a single part that clips in.
WXF4xxx

gallery innovations

Hager innovations are designed by involving numerous installers, technical advisers and private customers at a very early stage, using their input to facilitate implementation and everyday use.

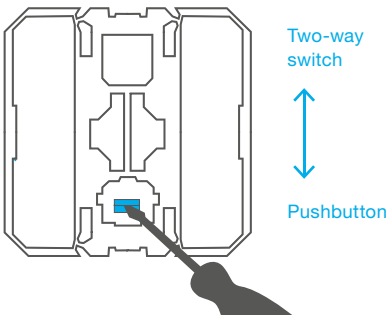

2 in 1

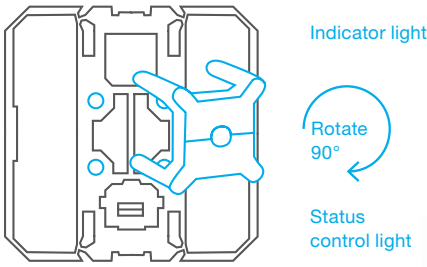

A single part to switch from two modules to one. By removing the side sections, a second mechanism can be installed within exactly the same surface area.

Two-way switch or pushbutton Universal indicator

Available within a single part, simply turn the screwdriver to swap between a two-way switch and a pushbutton.
Hager patented

Available within a single part, a status control light or indicator light can be added in one swift motion.
Hager patented

gallery Bluetooth, invisible connectivity

Imagine a gentle start to the day, with a bedroom dimmer gradually increasing the light as the roller shutters open.

With its Hager Mood application controlled from a smartphone, gallery bluetooth makes this a reality!

Hager Mood

gallery KNX, for customised connectivity

gallery KNX is bespoke intelligence for your top-end tertiary building or residential projects. Scenarios precisely tailored to your clients' needs, whatever they may be – for sustainable, energy-efficient buildings. You can also combine gallery KNX with the domovea solution to remotely monitor and control a home, business etc.

gallery in your projects

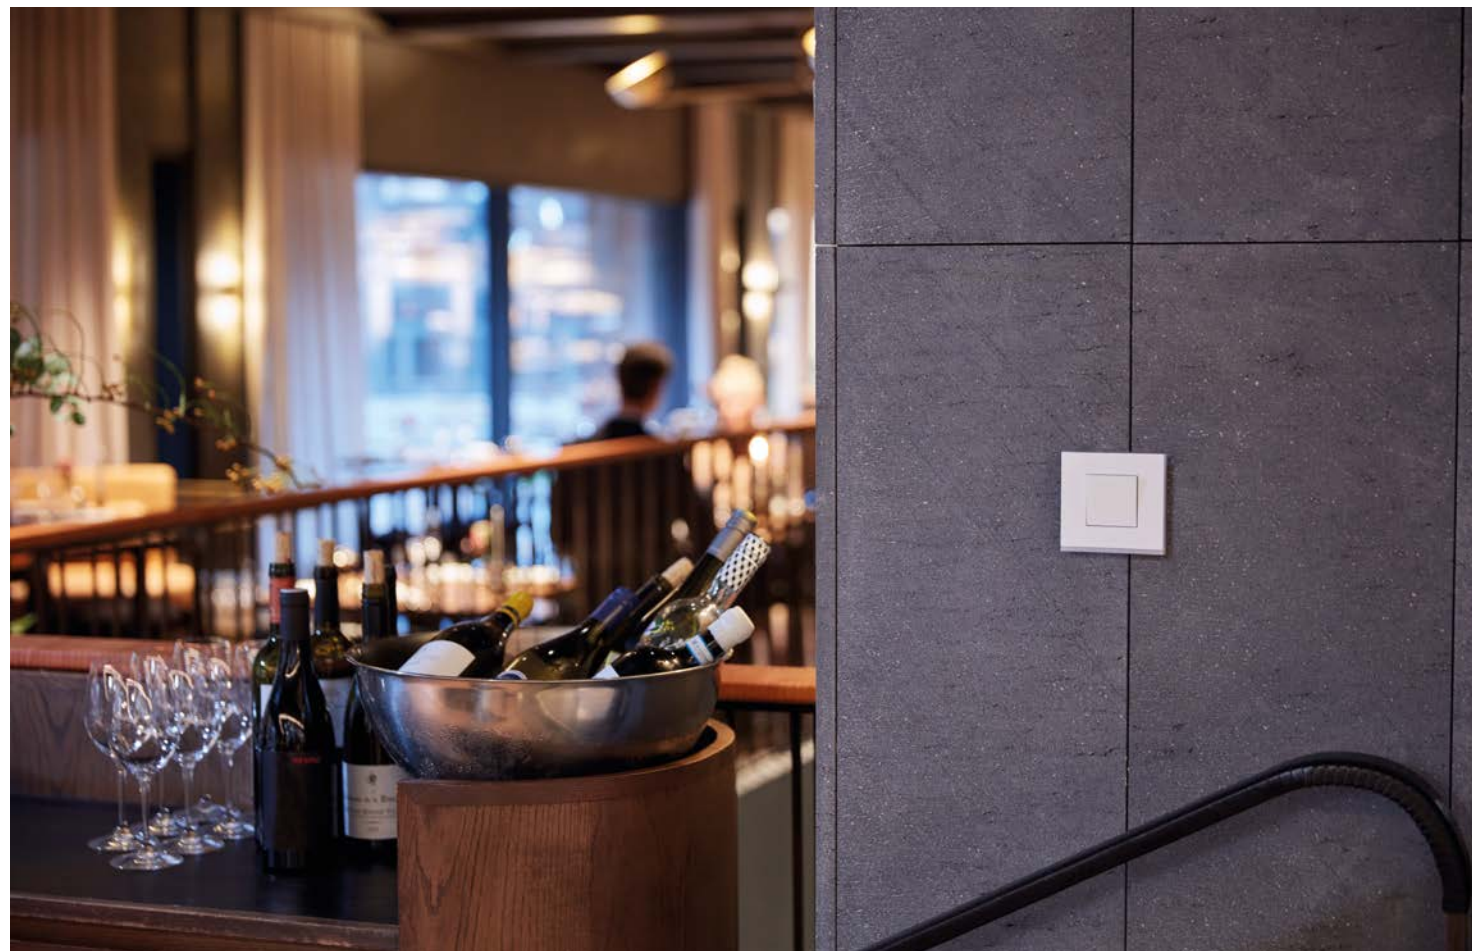

A universal solution for residential and tertiary building projects.

Residential and commercial buildings, offices, hotels, schools, new builds or renovation projects... gallery is a universal solution for all your current and future projects.

gallery in hotels

The wide choice of finishes, materials and colours available for gallery provides the final design touch a hotel needs, with a variety of functions suited to each space.

gallery in offices

gallery provides practical, aesthetic solutions to supply high and low current wherever users need it, with the adaptability required to meet the changing needs of workspaces.

gallery in
homes

gallery is the perfect solution for all living spaces within a home, contributing to the aesthetics and supplementing the technical solutions in an interior design project.

Design your gallery wall fitting

Because sometimes a building simply has to be unique, Hager offers a custom service to tailor the gallery wall fittings to your needs.

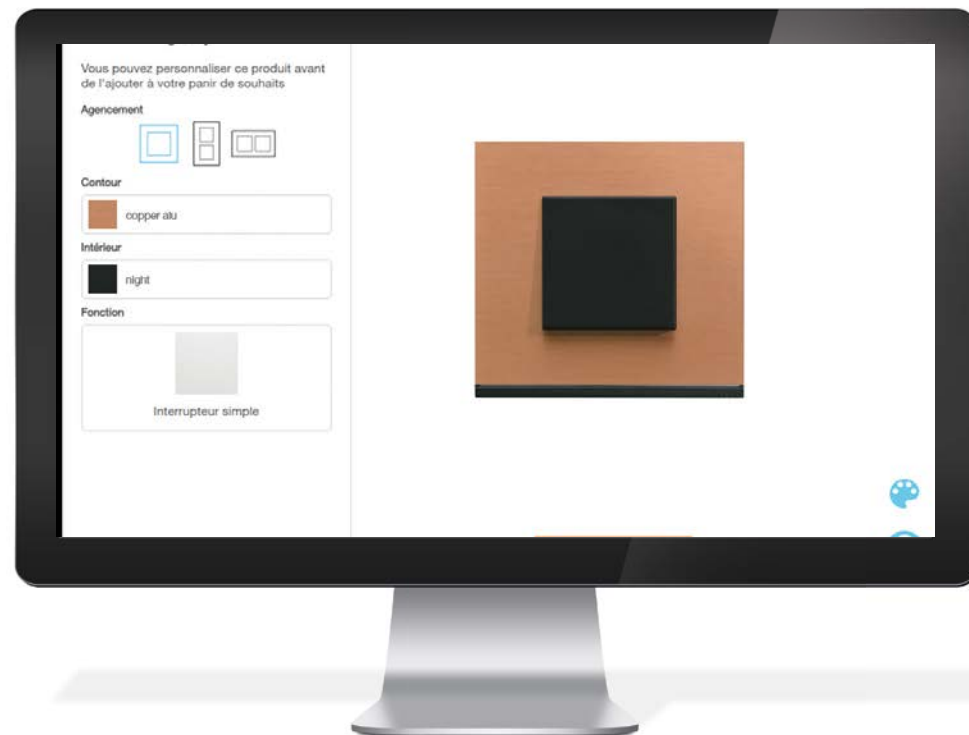

Colour, material, markings... you can design precisely the gallery switch that your building needs.

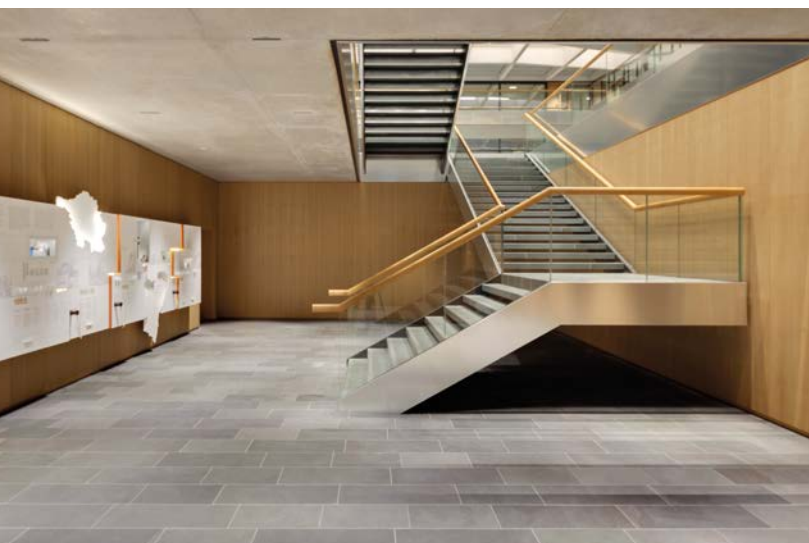

Take it further with gallery

Hager Switch web app

A simulator that allows you to visualise the functions and finishes to perfect your decorative projects.

To let your contacts discover gallery, we have made a whole range of tools available to you to facilitate selection. Contact the Hager representative for your region to find out more.

Visit our showrooms

Do you want to show your clients everything the range has to offer? Book an appointment to visit the Hager showrooms. It is a resource available for you to use freely.

We are your partner.

Because we know that business is done between people, being close to our customers is one of our most important corporate values. And that is exactly why you will not be assisted by just anyone, but by your personal contact. He understands what you need and exchanges ideas with our specialists when necessary. This enables him to offer you products and solutions that meet your requirements and provide real added value.

We accompany you through all phases of your project - with a comprehensive range of solutions and services and excellent advice. And make sure that our offers not only fit your specifications perfectly, but are also future-proof. The solutions offered are consistent and scalable and thus simplify the implementation of changes in the planning process.

To ensure a smooth process and to deliver the perfect solution, we leave nothing to chance. We network with all project participants and thus support the process – taking a noticeable weight off your shoulders.

:hager

Hager represents simplicity and safety in all aspects of electrical installation in residential and functional buildings.
